Garner's HD-2 degausser with IRONCLAD shown

IRONCLAD erasure report

Image of degaussed hard drive

Valuable data demands **IRONCLAD** proof of erasure.

Garner's economical HD-2 degausser with IRONCLAD automated erasure verification and image capture system validates data has been completely eliminated. Fully integrated with the Garner HD-2 hard drive degausser, the IRONCLAD scans the serial number, captures an image of the degaussed hard drive, and records the operator ID and erasure status of degaussed hard drives. This essential information is then preserved in an IRONCLAD erasure report. IRONCLAD provides audit-worthy documentation of the data elimination process.

HD-2 IRONCLAD Includes:

- Garner's economical HD-2 compact degausser
- IRONCLAD erasure report generating software
- Automated image capture system
- Touch screen control head
- Bar-code scanner and stand
- Stylus
- IRONCLAD software support for one year
- 50 "Degaussed" labels for erased hard drives

Why **IRONCLAD**

- HD-2 degausser completely erases all data in 60 seconds
- Captures and records images of degaussed hard drives
- Scans serial numbers of degaussed hard drives
- Documents operator ID and erasure status of hard drives
- Generates IRONCLAD erasure report with images for audit purposes
- Creates a secure erasure verification process
- Provides proof data is completely eliminated
